WORK EXPERIENCE

SATUKUNCI | January 2019 – March 2020 | Full Stack Programmer

Work Description :

- Fixing Errors & bugs in client's website including database structure, user interface design, government's document design such as pdf template and response from backend service including website's efficiency in times and resource given.
- Collaborate with Android Programmer about changes in backend service to prevent errors occurring on Client's android application.
- Configuring Electronic Signature services from the official provider and verifying if certificate used by our client is valid in the website's pdf output.
- Checking between client's request on new features and develop it within the given deadline & made sure if the website running smoothly without any error.

FREELANCE WEB DEVELOPER | March 2020 – Now | Full Stack Web Developer

Work Description :

- I Develop web applications according to client's specification, including prototyping, analyzing software requirements, & designing both user interface & database structure.
- Create, testing & integrating API resources within Web Application and Mobile App (Android).
- Collaborate with the android programmer, including the App Design & how user interact with our App.

PAST PROJECTS

- **SIBUK BANGAT (E-OFFICE)** | September 2019 | Laravel, Java

Is an eoffice type application, intended to help local government organizations in to reduce amount of paper, resource & time used in document request & submission system. Submitter can see the progress of the document position with the Unique Code given to them via email attachment.

- **E-PIDATO (E-OFFICE)** | April 2020 | Laravel, React

Sub-system similar to "Sibuk Bangat" but API based & it has digital signing feature integrated. User interaction with the app is also enhanced with React as its frontend.

- **OPEN E-OFFICE PROJECT – OEP** | December 2020 | Laravel, React, Redux

My last project with merged feature from the two previous project, but with enhanced user interface, a new feature which make documents queueable in signing & dispatching, and more flexible pdf signing with dynamic e-signature placement. Mobile web version of the app is also highly supported in OEP.

CERTIFICATION

Microsoft Technology Associate (MTA) in Software Development Fundamentals
(C#, & ASP.NET)

LANGUAGE

Indonesian & English
