

OPEN OFFICE PROJECT

DOCUMENT SIGNING GUIDE

FEBRUARY 2021, 2nd

Adobe Acrobat Reader is Recommended !

To check if PDF signed using a certificate, because the signer identity is embedded, reason , & location as well as the certificate issuer.

You can also see the expiry date of the signature. For the demo purpose, certificate expiry is set to 1 year. No timestamp or document revocation provided (CA issuer is not real anyway).

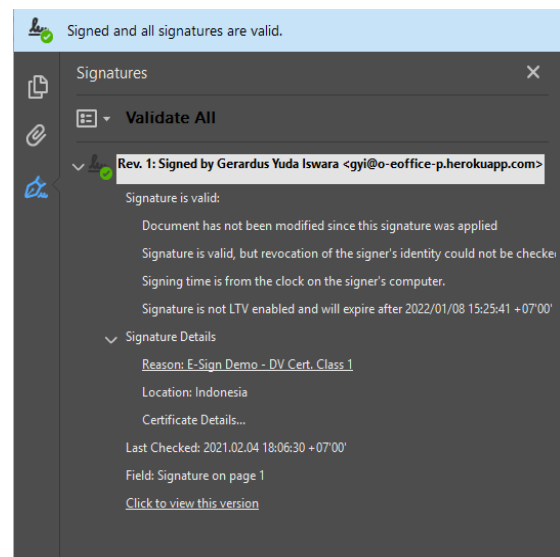

Is there anything else we can see?

Yes, notice the *“certificate details..”* in the right picture?

For many reason, don't ignore this, unless you have your own OCSP Server.

Why Acrobat ?

Listen, whatever you choose doesn't matter. If your preferred app can see info like this :

That is good then. This is E-Signature, not scratching pen on the paper, if you can't see any info on the signature, how do you know if the document was edited?

Next Thing is the Signing Page!

What is this Page ?

A Web Page. ._.

See the component on the right side ?

It is simply a form actually, just make sure to fill the passphrase field. You can see the passphrase there. But first of all, drag the QR first. Wherever you want, or at any page, your choice.

Please Drag the QR on the pdf container.
